

Verstandige keuzes bij interne geneeskunde

2) Voorkom het plaatsen van een urineverblijfskatheter bij stabiele patiënten op de Spoedeisende Hulp (SEH) die zelf nog kunnen plassen.

Het plaatsen van een urineverblijfskatheter brengt namelijk risico's – en extra kosten – met zich mee.

Zo zijn katheter-geassocieerde urineweginfecties een frequent voorkomend probleem in de Nederlandse ziekenhuizen.
